

## How to work with IFTTT

1. Go to LuffaReactor (<https://reactor.luffanet.com.tw/#/>)
  - click “IFTTT” icon on top right
  - go to “ My Applets” → press “ New Applet” to create your applet.

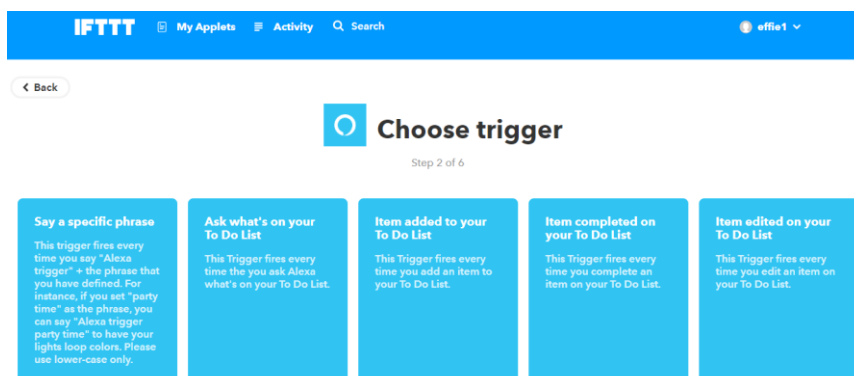

2. Press “+ this” and choose “Amazon Alexa” service → Press “Connect”

3. Choose trigger method you wish to have and here is the example for your reference.

- Select “ Say a specific phrase” and key in phrase start to work → press “Create Trigger”

### Complete trigger fields

Step 2 of 6

**Say a specific phrase**

This trigger fires every time you say “Alexa trigger” + the phrase that you have defined. For instance, if you set “party time” as the phrase, you can say “Alexa trigger party time” to have your lights loop colors. Please use lower-case only.

What phrase?

Use lower-case characters only

Create trigger

- Press “ + that” and search “luffaReactor” action service

Back

if  then  that
